THE SPORTY DUTCH DESIGN CITY BIKE

Tricycle City

A smooth riding bicycle with stability

The City tricycle features a new contemporary look from Dutch Design with even more cycling comfort. The bicycle has been developed for users who need more stability and extra safety for frequent use. The low entry height ensures that you can easily get on and off. The tricycle can also be adjusted to your wishes and circumstances. There are various accessories available with which you can make your bike even more personal. The City makes you more mobile and independent!

We look at individual cyclists and their needs and want to match them as well as possible. This way, we continuously innovate and optimize our bikes, so that your bike is equipped with the best materials and optimum comfort. For example, the City is light in weight and also suitable for taller cyclists, due to the increased crank length.

The City tricycle comes standard with a parking brake, hydraulic disk brakes at the rear wheels, a largely closed modern chain guard and a safety lock (AXA solid).

✓ Extremely stable, safe and maneuverable due to the differential and low center of gravity.

✓ Available with powerpull service friendly electric support.

✓ Available in two sizes with a very low step height (19 cm), making getting on and off easy.

✓ Equipped with rear hydraulic disc brakes, which require less hand power.

✓ 10 year warranty on the frame and front fork.
After registration at www.hukabikes.com/warranty

Electrical support

The City is available with pedal support adjusted with torque or speed sensor. With the help of this drive it is easier to pedal and therefore less tiring. This silent pedal support is standard supplied with a start help, five travel speed settings and a clear display.

In addition, the City also can be provided with an electrical drive with speed sensor, to activate this system you only need to move the pedals and not to give any force on them.

Make your City bike more personal

With the City we can offer various extra supports such as a backrest, various foot fixations etc. This way we can make your City suitable to your situation. The City can be equipped with various accessories and options.

Do you want a coaster brake, a reverse pedalling automatic or an 8-speed hub? View the options on our website or inquire with your dealer.

Colors

The tricycle City standard comes in:

- Bright metallic blue (RAL5025)
- Gun metal silver with a matte look
- Cream white (Country edition) (RAL1013)

Do you want to make your bike even more personal? Other RAL colors are available on request.
